## LOWER YOUR ELECTRIC BILL AT LEAST 10%

San Antonio Security's Interactive alarm systems allow you to operate your alarm remotely with your smartphone, tablet or laptop. However, that's only the beginning. Our Interactive Systems also include controlling your lights and air conditioning remotely with the same devices.

You can customize your system to hold a pre-set temperature of your heating or air conditioning based on whether your system is armed or disarmed. With this type of remote control, you can reduce wasted electricity which has been proven to save at least 10% on your electric bill each month. The amount you save, just on this feature alone, can pay for the Interactive equipment and service over a short period of time.

Additionally, the Interactive system allows you to receive texts of arming and disarming of your alarm system, giving you the user's name. With cameras at your home, the Interactive system will also allow you to view activity inside or outside of your home on all of your devices.

Our Interactive systems provide you security, convenience and savings! Call our office now for more information and a free home assessment.
