In recent years, there has been a tidal wave of new technology that has made our world more accessible. Smart phone and tablet apps in particular have enhanced our lifestyles and brought information to us in ways we could never have imagined.

As you may have noticed, the world of electronic security has merged with the current wave of smart device interoperability. We want all of our customers to be aware that San Antonio Security is at the forefront of this new technology and that we can provide you with many new services to enhance your lifestyle.

At the most basic level, we can provide you with remote arming and disarming of the alarm system combined with mobile notification services which let you know immediately on your smart phone if your system has been armed or disarmed or if there is an alarm at your home or business. All of this would be done through a smart device app.

San Antonio Security can also go a step further and install equipment that will allow for the above services plus certain home automation features. These features would also work over a smart device app and can include: 1.) Controlling of all thermostats to save energy, 2.) Control lighting, 3.) Control door locks, 4.) Control garage doors, and 5.) Camera systems with remote viewing of your home or business.

These services may entail an upgrade to your current system so please call San Antonio Security for a free quote. We realize that some out of state alarm companies may be knocking on your door offering these same services, so please know that you can get it all from your Local Company that you have known and trusted for your Home or Business: **San Antonio Security**. We appreciate you very much and we look forward to serving you for years to come!

Gary & Patsy Noll
